## RECONSTITUTION OF MYALEPTA™ (METRELEPTIN FOR INJECTION)

To obtain the MYALEPTA solution for your injection, you need to mix the MYALEPTA powder with the sterile water for injection (newborns and infants) or bacteriostatic water for injection (for older children and adults)

| MYALEPTA vial   | Type of diluent | Diluent volume | Syringe to use |
|---|-----------------|----------------|----------------|
|  11.3 mg | BWFI            | 2.2 mL         | 3.0 mL         |
|  5.8 mg  | SWFI            | 1.1 mL         | 3.0 mL         |
|  3.0 mg  | SWFI            | 0.6 mL         | 1.0 mL         |

BWFI = bacteriostatic water for injection; SWFI = sterile water for injection

Please refer to the detailed Instructions for Use before attempting to prepare and inject your MYALEPTA.

### SYRINGE USED TO RECONSTITUTE MYALEPTA

3.0 mL syringe    1.0 mL syringe

**You will be using**

If you get any side effects, talk to your healthcare professional. This includes any possible side effects not listed in the package leaflet.

# Patient Dose Information Card

Your MYALEPTA dose is \_\_\_\_\_ mg

injecting \_\_\_\_\_ mL or \_\_\_\_\_ units.

## ADMINISTRATION OF MYALEPTA (METRELEPTIN FOR INJECTION)

To self-inject MYALEPTA, you need to fill the syringe with the right amount of MYALEPTA solution.

Depending on your dose you will use a 3.0 mL, a 1.0 mL or a 0.3 mL syringe to inject MYALEPTA.

The size of injection syringe for administration will be chosen by your doctor or pharmacist for your dose of MYALEPTA.

If your dose is 1.25 mg or less - you will use a 0.3 ml syringe.

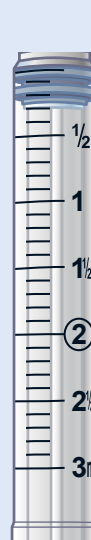

If your dose is more than 1.25 mg up to 5 mg - you will use a 1 ml syringe.

If your dose is more than 5 mg - you will use a 3.0 ml syringe.

*If you have any questions about your dosage, the reconstitution or administration of MYALEPTA, contact your healthcare professional before you self-inject MYALEPTA. More information is available in the MYALEPTA Patient Care Guide.*

*Doctor or nurse contact details:*
